Taiz Uddin Ahmed
Co-ordinator

Seminar Organizing Committee
Bhawanipur Anchalik College

About the Seminar:

One of the most important and mass discussed issues in the field of social life of the world today is human rights. Human Rights are the rights concerning to the survival of human beings in civil society keeping and maintaining the dignity of life as per the norms of peaceful living. The question of preservation and violation of human rights has become one of the very critical questions for the human beings in all parts of the global society. All expect to lead life in peace without any discrimination but because of competition for the acquisition of power, position and money or wealth to establish superiority as individual, group, society, party and nation there has always been the tendency and trend of domination by violating the general ethics of life and living.

We have seen the very recent phenomenon concerning to the human rights of the people of some of the parts of the countries, like Syria who are for maintaining the existence trying to enter into the countries of the west like Germany, France etc. and the problems they faced. Situations of political and social turmoil have forced the people of the countries to face lot of problems in peaceful existence without any personal fault or crime only because of social instability resulted from terrorist activities of some groups. Human rights, as we understand are the moral principles or norms that describe certain standards of human behaviour, and are regularly protected as legal rights in municipal and international law for peaceful survival in any parts of the globe as per the law and rights of living. The very first sentence of the Preamble to the Universal Declaration of Human Rights pleads “All human beings are born free and equal in dignity and rights”. Thus human rights are the rights, a person has simply, because, he or she is a human being.

Human rights violations also occur every day in this world in different forms, nature and dimensions. Therefore, to prevent violation of human rights it is necessary to educate people of all walks on human rights. For making the global society a better place of living

with the spirit of live and let live there is the need of taking steps for the spread of human rights education to all the parts of human society. Therefore, it has been expected that the seminar will certainly help people assemble for finding out a common formula and a common agenda for the spread of human rights education towards all parts of society with the help of the people in the sector of higher education.

The aims and objectives of the seminar are to help people learn the principle of live and let live. For peaceful living there is the need of harmony between all sections and all nations of the world. Therefore, the seminar will certainly work for spreading human rights education towards all corners of the locality, state, country and the global society as well. The seminar on Human rights education will also provide a basis for conflict resolution and the promotion of social order. Rights themselves often clash, such as when one person's commitment to public safety conflicts with another's freedom of expression. As a value system based on respect and the equality and dignity of all people, human rights can create a framework for analyzing and resolving such differences. Thus, Human rights education will also teach the skills of negotiation, mediation, and consensus building. The seminar on Human rights education will help to learn about human rights necessary for uplifting conditions of living in harmony. Its goal is to help participants understand human rights, value human rights, and take responsibility for respecting, defending, and promoting human rights. Expected important outcome of the seminar is empowerment, a process through which people and communities increase their control of their own lives and the decisions that affect them. The ultimate goal of the seminar on human rights education is to educate people working together to bring about human rights, justice, and dignity for all.

Bhawanipur Anchalik College at a Glance:

Bhawanipur Anchalik College a premier institution of higher education was established on 28th November, 1982, with a sole motive to spread higher education among the rural populace of greater Bhawanipur area.
